## Technical appendix tables for 2022 longterm trend reading and mathematics Assessments At Age 9

## Table of Contents

Page
School and student participation rates at age 9 in NAEP long-term trend reading, by type of school: 2022 ..... 1
School and student participation rates at age 9 in NAEP Iong-term trend mathematics, by type of school: 2022 ..... 2
Percentage of students identified as students with disabilities and/or English learners excluded in NAEP long-term trend reading and mathematics, as a percentage of all students, by subject and age group: Various years, 1990-2022 ..... 3
Percentage of 9-year-old students with disabilities (SD) and/or English learners (EL) identified, excluded, and assessed in NAEP long-term trend reading, as a percentage of all students, by SD/ EL category: 2022 ..... 4
Percentage of 9-year-old students with disabilities (SD) and/or English learners (EL) identified, excluded, and assessed in NAEP long-term trend mathematics, as a percentage of all students, by SD/EL category: 2022 ..... 5
Percentage of students at age 9 identified as students with disabilities (SD) and/or English learners (EL) assessed in NAEP long-term trend reading with accommodations, by SD/EL category and type of accommodation: 2022 ..... 6
Percentage of students at age 9 identified as students with disabilities (SD) and/or English learners (EL) assessed in NAEP long-term trend mathematics with accommodations, by SD/EL category and type of accommodation: 2022 ..... 7
Percentage distribution of students at age 9 in NAEP long-term trend reading, by selected characteristics: Various years, 1971-2022 ..... 8
Percentage distribution of students at age 9 in NAEP long-term trend mathematics, by selected characteristics: Various years, 1978-2022 ..... 9
Average score results at age 9 in NAEP long-term trend reading, by selected characteristics: Various years, 1971-2022 ..... 10
Average score results at age 9 in NAEP long-term trend mathematics, by selected characteristics: Various years, 1978-2022 ..... 11

## School and student participation rates at age 9 in NAEP long-term trend reading, by type of school: 2022

|  | School participation |  | Student participation |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
|  | Student- <br> weighted <br> percent | School- <br> weighted <br> percent | Number of <br> schools <br> participating | Student- <br> weighted <br> percent | Number of <br> students <br> assessed |
| Type of school | 86 | 73 | 410 | 87 | 7,400 |
| Nation | 90 | 89 | 370 | 87 | 7,000 |
| Public | 32 | 29 | 50 | 91 | 400 |
| Private |  |  |  |  |  |

NOTE: The national totals for schools include Department of Defense Education Activity (overseas and domestic schools) and Bureau of Indian Education schools, which are not included in either the public or private school totals. The number of schools is rounded to the nearest ten. The number of students is rounded to the nearest hundred. The school participation rates are studentweighted percentages before substitution. Columns of percentages have different denominators. Detail may not sum to totals because of rounding.

- Not available.
\# Rounds to zero.
$\ddagger$ Reporting standards not met. Sample size insufficient to permit a reliable estimate.
* Significantly different ( $p<.05$ ) from 2022.
${ }_{2}^{1}$ Original assessment format. Results prior to 2004 are also from the original assessment format.
${ }^{2}$ Revised assessment format. Results after 2004 are also from the revised assessment format.
NOTE: Black includes African American, Hispanic includes Latino, and "Other" includes Asian/Pacific Islander, American Indian/Alaska Native, and unclassified, which was used in the NAEP Iong-term trend assessment prior to 2012 and was classified as Two or More Races in 2012 and later assessment years. Race categories exclude Hispanic origin. For the grade attended variable, fourth grade is the typical grade for 9 -year-old students. Results are not shown for private schools under the type of school category because the participation rate for private schools did not meet the minimum participation guidelines for reporting in 2020. Results are not available for eligibility for the National School
Lunch Program (NSLP) prior to 2004 in NAEP long-term trend assessments. The information about NSLP variable is based on available school records. If school records were not available, the student was classified as "Information not available." NAEP aims to include all students sampled for the assessments including students with disabilities and English learners. This goal is accomplished by allowing many of the same accommodations that students use on other tests such as extra testing time or individual
administration. Traditionally, the long-term trend assessments have not provided such accommodations. Accommodations were first made available in the long-term trend assessments in 2004 as part of the changes made to the assessment. The category "students with disabilities" includes students identified as having either an Individualized Education Program or protection under Section 504 of the Rehabilitation Act of 1973 . The results for students with disabilities and English learners are based on students who were assessed and cannot be generalized to the total population of such students. Detail may not sum to totals because of rounding.

$\ddagger$ Reporting standards not met. Sample size insufficient to permit a reliable estimate.
* Significantly different ( $p<.05$ ) from 2022.
${ }_{2}^{1}$ Original assessment format. Results prior to 2004 are also from the original assessment format.
${ }^{2}$ Revised assessment format. Results after 2004 are also from the revised assessment format.
NOTE: Black includes African American, Hispanic includes Latino, and "Other" includes Asian/Pacific Islander, American Indian/Alaska Native, and unclassified, which was used in the NAEP long-term trend assessment prior to 2012 and was classified as Two or More Races in 2012 and later assessment years. Race categories exclude Hispanic origin. For the grade attended variable, fourth grade is the typical grade for 9 -year-old students. Results are not shown for private schools under the type of school category because the participation rate for private schools did not meet the minimum participation guidelines for reporting in 2020. Results are not available for eligibility for the National School Lunch Program (NSLP) prior to 2004 in NAEP long-term trend assessments. The information about NSLP variable is based on available school records. If school records were not available, the student was classified as "Information not available." NAEP aims to include all students sampled for the assessments including students with disabilities and English learners. This goal is accomplished by allowing many of the same accommodations that students use on other tests such as extra testing time or individual administration. Traditionally, the long-term trend assessments have not provided such accommodations. Accommodations were first made available in the long-term trend assessments in 2004 as part of the changes made to the assessment. The category "students with disabilities" includes students identified as having either an Individualized Education Program or protection under Section 504 of the Rehabilitation Act of 1973. The results for students with disabilities and English learners are based on students who were assessed and cannot be generalized to the total population of such students. Detail may not sum to totals because of rounding.
